

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Marketing As Art × SHOPLINE iOS App Map

The overall structure

MARKETING AS ART

AI MARKETING INTELLIGENCE

And **LEARN** is the closed loop that feeds back into Home, Intelligence and Advisor.

That's important because your OS already has this closed-loop philosophy: intelligence → strategy → campaign → execution → real-time signals → learning.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

0. ONBOARDING & SHOPLINE CONNECTION

This isn't one of the five bottom tabs.

It's the **entry experience**.

Scene 0.1 — Welcome

Marketing As Art

AI Marketing Intelligence for your business.

Continue

Scene 0.2 — Connect SHOPLINE

Connect your SHOPLINE business

Connect your store so Marketing As Art can understand your:

- products
- customers
- orders
- business performance
- marketing context

Connect SHOPLINE

This is directly relevant to the signed agreement because the project is explicitly the development and integration of the Application onto SHOPLINE, including API connectivity and data synchronization.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Scene 0.3 — Permissions / Data

Show clearly:

What Marketing As Art can access

Rather than dumping technical permissions on the merchant.

Scene 0.4 — Business Intelligence Initialization

This could be a **beautiful MAA signature scene**.

Something like:

Building your Business Intelligence

Analyzing:

Business → Customers → Products → Market → Performance

Then:

Your intelligence layer is ready.

This is where you can make the first impression extremely strong.

Scene 0.5 — Business Profile

Basic business context:

- Brand
- Category
- Market

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

- Country
- Goals
- Business stage

This is consistent with your existing OS's Brand DNA / Audience / ecosystem onboarding architecture.

01 — HOME

UNDERSTAND

This is the most important screen.

I would **not** call it **Dashboard**.

Call it something like:

Business Intelligence

or simply:

Home

The user opens the app and immediately sees:

Here's what's happening in your business.

Scene 1.1 — Intelligence Briefing

Example:

Good morning.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Your business intelligence

3 things deserve your attention.

01 — Growth signal

Returning customers are showing stronger purchase intent.

Impact · HIGH

Explore

02 — Marketing health

Your acquisition is healthy, but retention is weakening.

Health · 72

View Health

03 — Market opportunity

A new demand pattern has been detected.

Opportunity · HIGH

Explore

This takes inspiration from your existing /war-room, which already contains KPI overview, AI insights, automated briefings, anomaly detection and recommended actions.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

But on iOS I'd make it much more **editorial/intelligent** and much less dashboard-like.

Scene 1.2 — AI Marketing Health Check ★

This is one of the four SHOPLINE flagship experiences.

Marketing Health

74 / 100

Then break it down:

Customer

82

Acquisition

76

Retention

61

Brand

84

Market Position

73

Then:

Your biggest weakness is retention.

See why

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Scene 1.3 — Health Detail

The user sees:

What we found

Why it matters

Evidence

What we recommend

Expected impact

Take action

This is where your **explainable AI** positioning becomes visually real.

The proposal specifically emphasizes explainable, evidence-informed recommendations.

02 — INTELLIGENCE

UNDERSTAND → DISCOVER

This is your **Intelligence Hub**.

The existing OS already has /intelligence as the Market Intelligence Hub, covering market signals, sentiment, opportunities, trends, forecasting, research and AI insights.

But on iOS I'd structure it as:

Intelligence

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Market
Customers
Competitors
Voice of Customer
Trends

Not five separate pages in the navigation.

Scene 2.1 — Intelligence Overview

Top:

What changed?

Then intelligent signals:

Market

Demand ↑

Customers

Retention ↓

Competitors

New positioning detected

Voice

Customers increasingly mention...

Scene 2.2 — Market Intelligence

Show:

- market trends

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

- emerging signals
- market size
- growth
- opportunities
- forecasts

Your existing OS supports all of these.

Scene 2.3 — Customer Intelligence

Show:

- customer behavior
- segments
- satisfaction
- loyalty
- churn
- purchase motivations

Scene 2.4 — Voice of Customer ★

This is another SHOPLINE flagship.

What are your customers telling you?

Then:

Top motivations

Top frustrations

Emerging needs

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Sentiment

Churn signals

What customers want next

Your existing Market Opportunity Engine already defines Customer Voice Intelligence around emotion, pain points, purchase motivation, loyalty drivers and churn signals.

Scene 2.5 — Customer Voice Detail

This is where raw feedback becomes:

BUSINESS INTELLIGENCE

For example:

"Customers love the product — but 31% mention delivery uncertainty."

Why it matters

...

Opportunity

...

Recommended action

Build Retention Strategy

This connects Intelligence → Decision.

Scene 2.6 — Competitor Intelligence

Not a generic competitor list.

Instead:

What are competitors doing that matters to you?

- positioning shifts
- strengths
- weaknesses
- pricing
- customer sentiment
- opportunity gaps

03 — OPPORTUNITIES

DISCOVER

This should be one of the **most visually impressive parts of the app**.

Your existing Market Opportunity Engine is already designed around turning customer/competitor signals into revenue-oriented opportunities.

The new iOS version should simplify that into:

Opportunities

Where can you grow next?

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Scene 3.1 — Opportunity Feed

Example:

HIGH IMPACT

Retention Opportunity

Potential:

+\$42K

Confidence:

87%

Explore

MARKET GAP

Customers are looking for...

Potential:

+\$28K

Explore

COMPETITIVE GAP

Your competitor is underperforming in...

Explore

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Scene 3.2 — Opportunity Detail ★

This should be one of the signature screens of the entire app.

RETENTION OPPORTUNITY

Impact
HIGH

Confidence
87%

Potential
+\$42K

What we discovered

...

Evidence

...

Why this matters

...

Recommended move

...

Expected outcome

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

...

Then:

BUILD STRATEGY

That button is critical.

Because the app should not stop at intelligence.

Scene 3.3 — Opportunity Comparison

Let the merchant compare:

Opportunity A

\$42K

Opportunity B

\$28K

Opportunity C

\$17K

Then:

AI Recommendation

Prioritize Opportunity A.

Reasoning...

Accept Recommendation

This is where the app starts feeling like a **business decision system**.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

04 — CREATE

DECIDE → CREATE → ACT

This is where the existing Strategy Engine + Campaign system gets transformed.

The current OS has a dedicated Strategy Engine producing 90-day strategies, budgets, channels, KPIs and timelines.

But the mobile experience should make the flow:

Insight → Strategy → Campaign

Scene 4.1 — Create

Instead of showing 15 tools:

What do you want to accomplish?

Build a strategy

Create a campaign

Act on an opportunity

Create marketing content

Scene 4.2 — AI Strategy Builder ★

The AI takes the selected intelligence/opportunity as context.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Example:

Let's turn this opportunity into a growth strategy.

Then:

Objective

Increase returning customer revenue.

Audience

High-value returning customers.

Positioning

...

Channels

...

Budget

...

Timeline

...

Generate Strategy

Scene 4.3 — Strategy Result

30-Day Growth Strategy

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

Objective

...

Audience

...

Positioning

...

Channels

...

Budget

...

KPIs

...

Then:

Build Campaign

Scene 4.4 — AI Campaign Planner ★

This is the fourth flagship SHOPLINE experience.

The proposal specifically names AI Campaign Planner as a potential integration following successful pilot outcomes and includes it among proposed pilot activities.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

The flow:

Campaign

Goal

Retention

Audience

Returning customers

Offer

...

Channels

Instagram

Email

WhatsApp

Timeline

...

Create Campaign

Scene 4.5 — Campaign Preview

Show:

- campaign concept
- audience
- messaging

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

- creatives
- channels
- schedule
- KPIs

Then:

Approve

or

Edit

Scene 4.6 — Execution

This is the **ACT** stage.

Depending on what SHOPLINE/API scope actually supports, this can eventually include:

- schedule
- publish
- export
- send
- monitor

I would **not** promise a particular execution capability in the UI until the SHOPLINE technical scope confirms it.

The signed agreement establishes integration/API/data synchronization, but it doesn't itself specify every campaign-execution action.

05 — AI ADVISOR

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

DECIDE

This is where I'd make Marketing As Art feel truly different.

Not:

Chat with AI

but:

Your Growth Advisor

The existing MAA OS already defines the AI CMO as a brand/context-aware advisor with memory, voice and multilingual interaction.

And the SHOPLINE proposal specifically identifies **AI Growth Advisor** as a partnership opportunity.

Scene 5.1 — Advisor Home

Your Growth Advisor

I found 2 things you should look at.

Retention opportunity

Competitor positioning shift

Then:

Ask me about your business

But the conversation isn't the whole interface.

Scene 5.2 — Advisor Conversation

User:

Why is retention becoming my biggest issue?

AI:

I found three signals...

Then evidence.

Then:

My recommendation

...

Build Strategy

Scene 5.3 — Advisor Recommendation

A dedicated intelligence response:

I recommend...

Prioritize retention before increasing acquisition spend.

Confidence · 89%

Based on

- customer behavior

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

- purchase history
- campaign performance
- market signals

Build Strategy

Scene 5.4 — Voice

Because your existing OS supports multilingual voice input/output, this can eventually become:

Talk to your business.

The underlying OS already specifies voice input/output and 12-language support.

I'd make voice an **interaction layer**, not a separate "Voice page."

06 — LEARN

THE CLOSED LOOP

Here's where I would make a significant conceptual decision:

I would NOT create "Learn" as a sixth navigation tab.

It should be a **system-wide layer**.

Because Learn isn't another destination.

It's the outcome of everything else.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

After a campaign:

Campaign Results

What happened?

What did we predict?

What actually happened?

What did we learn?

What should we change?

Next recommendation

This is highly aligned with the MAA OS architecture, which describes a closed-loop system where execution generates real-time signals that feed back into strategy and learning.

So:

LEARN → updates INTELLIGENCE → influences ADVISOR → improves CREATE

That's your real differentiator.

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

So the final navigation becomes

I would make the bottom navigation:

Tab	Purpose	Decision Stage
Home	Business Intelligence	UNDERSTAND
Intelligence	Market / Customer / Competitor	UNDERSTAND → DISCOVER
Opportunities	Growth opportunities	DISCOVER
Create	Strategy / Campaigns	DECIDE → CREATE → ACT
Advisor	AI Growth Advisor	DECIDE

And **Learn** is embedded across all five.

The actual page map

Here's the version I'd hand directly to Claude/Figma:

MARKETING AS ART — iOS

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP

That's roughly 30 named scenes, but only about 17–20 primary product screens.

That's exactly what I want.

Because "screen count" and "feature count" aren't the same thing.

A sophisticated iOS product needs **states and transitions**. For example, an Opportunity Detail screen might have:

Loading → Analysis → Evidence → Recommendation → Action → Success

Those are **scenes/states**, not six separate navigation pages.

And I would give Claude this exact mental model

This is the part I think is strongest:

MARKETING AS ART

Where Marketing Becomes Art, and Results Become Certain.

MARKETING AS ART & SHOPLINE
APP MAP
